

Please add new claim 104 as follows:

¹² ^{Rule} ¹²⁴ ¹⁰⁵ ~~104~~. (New) A leg assembly according to claim 33, where in each leg has an elongated vertical wall having a plurality of slots formed along a vertical direction thereof, ¹¹² the height adjuster comprising a leg engaging member movably connected to the slider, the leg engaged member being biased toward the elongated wall and movable substantially horizontally, the leg engaging member having a projection dimensioned to extend through the slot and hold the leg relative to the slider.

REMARKS

Applicants respectfully request that the foregoing amendments be made prior to examination of the present application. Claims 33-35 and 104 are now pending in this application.

Page 47 of the application originally included a claim numbered 32. This claim was improperly numbered and improperly made dependent on claim 31. Applicants have canceled claim 32 appearing on page 47 and have rewritten it as new claim 104, dependent on claim 33.

Favorable consideration of the application as amended is respectfully requested.

Respectfully submitted,

Date November 13, 2001
